DETAILED ACTION

Drawings

1. Figures 3-7 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 5 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 5, the claim recites the limitation "the image" in line 3. There is insufficient antecedent basis for this limitation in the claim.

Regarding claim 5, the phrase "a coding system" renders the claim indefinite because it is unclear what the claimed system comprises. The language of the claim suggests a method without any clearly identified components of a system.

Allowable Subject Matter

4. Claims 1-4 are allowed.
5. The following is a statement of reasons for the indication of allowable subject matter:

Relative to independent claim 1, the major difference between the teaching of the prior art of record (Chevet, US 6,201,519) and the instant invention is that the said prior art does not teach for the video levels of the pixels of the image being defined by n-bit video words, each bit, depending on its state, illuminating or not illuminating the cell to which it is addressed for a specific time called the subfield, wherein for video levels GL1 and GL2 to be displayed by a pair of cells situated in the same column and in two adjacent rows of the panel, video words VW1 and VW2 are selected, the said words comprising at least one common bit addressed simultaneously to the two cells at the moment of displaying the image and corresponding to levels equal or approximately equal to the video levels GL1 and GL2 such that, if $GL1 > GL2$, then the temporal centre of gravity of the illumination generated by the video word VW1 is greater than that generated by the video word VW2 below a predetermined video level.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

Art Unit: 2629

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
